PROFESSIONAL SUMMARY

Business Analyst and Computer Science graduate with separate degrees in Computer Science and Business Administration. Skilled in using SQL, Python and Tableau to clean large datasets and translate complex data into actionable operational insights. Experienced in identifying regional loss trends, building dashboards and optimizing business processes to support data driven decisions.

TECHNICAL SKILLS

- **Data & Analytics:** SQL, Data Entry & Validation, Data Organization, Data Cleaning, Statistical Analysis, KPI Tracking, Data Visualization, Business Intelligence Analysis
- **Programming Languages:** Python, PHP, HTML, CSS, Java, C++, Kotlin (Android Studio)
- **Analytical Tools & Platforms:** Microsoft Office Suite (Excel, Word, Outlook, PowerPoint), Google Workspace, MariaDB, MySQL Workbench, AWS, Github
- **Core Competencies:** Database Design, Object Oriented Design, Software Development Principles, Data Integrity, Requirements Gathering, Trend Analysis, Reporting, Stakeholder Communication

CERTIFICATIONS & EDUCATION

- **Google Data Analytics Professional Certificate** | Google / Coursera | March 2026
- **B.S., Computer Science** | SUNY Old Westbury, Old Westbury, NY | December 2025
- **B.B.A., Management** | Hofstra University, Hempstead, NY | May 2014
- **A.A., Culinary Arts** | Culinary Institute of America, Hyde Park, NY | March 2016

PROJECTS

Superstore Sales Analysis | <https://github.com/mcovelli/SuperStoreSalesAnalysis.git>

- Analyzed 10,000+ commercial sales transactions using SQL to evaluate regional business performance and track trends.
- Isolated a revenue issue where aggressive discounting in the Central region caused a negative 133% profit margin that dragged down overall profitability.
- Cleaned and verified transaction records by validating order dates and customer IDs while removing null, whitespace and negative sales values.
- Created dashboards visualizing performance trends and sub category profitability, enabling stakeholders to identify underperforming regions and discount losses.

NYC Crime Complaint Analysis | https://github.com/mcovelli/nyc_crime_complaints.git | <https://nyccrimecomplaints.streamlit.app>

- Processed 9.4 million NYC crime records from 2006 through 2024 using Python to examine trends across temporal and demographic segments.
- Executed data cleaning and validation routines in Python to standardize demographic fields and correct offense dates across millions of rows.
- Built and deployed a live Streamlit web application featuring twelve data visualizations and local Llama 3 model integrations via Ollama for automated summaries.

Database System with Web Interface | <https://github.com/mcovelli/SystemsProject.git>

- Collaborated on a 58 table relational schema in MariaDB modeling student, faculty and enrollment structures across hundreds of thousands of records.
- Implemented database level stored procedures and triggers to enforce business logic and data integrity rules.
- Validated generated data across all 58 tables to resolve referential integrity issues and ensure consistency between related entities.
- Hosted database infrastructure and deployed a functioning role based PHP web interface on AWS.

PROFESSIONAL EXPERIENCE

Referral Coordinator / Client Services Representative Medsource National | Garden City, NY | Feb 2019 - Sep 2023

- Tracked and organized thousands of referral and deposition records across networks of clients, physicians and attorneys.
- Managed confidential client files, medical reports and independent medical examination reports with strong attention to data governance.
- Processed incoming referrals received from insurance adjusters and defense attorneys to ensure all necessary documentation was collected.
- Coordinated depositions and resolved scheduling inquiries between physicians, patients and legal counsel.

Data Entry Specialist Lawyers Land Services | West Hempstead, NY | Oct 2018 - Feb 2019

- Digitized, validated and organized legal documents into structured databases to ensure data integrity.
- Conducted quality control reviews by comparing digital database entries against physical source documents to reduce data errors.
- Managed the secure storage, retrieval and disposal of outdated confidential records in accordance with privacy standards.

Independent Rideshare Driver Uber | New York City Metro Area | June 2024 - Present

- Managed daily independent business operations, tracking mileage, expenses and earnings to optimize profitability.
- Analyzed passenger demand patterns and peak hours to plan efficient driving schedules and maximize trip volume.

PRIOR OPERATIONS EXPERIENCE

- **Assistant Manager** | The Rex Burger & Lobster, Mineola, NY | May 2018 - Oct 2018 – Supervised personnel, managed food inventory data to minimize waste and reviewed team workflows.
- **Line Cook** | Volpe at Fox Hollow, Woodbury, NY | Jun 2017 - Apr 2018 – Maintained workspace synchronization, managed storage temperatures and followed precise recipe specifications.
- **Assistant Chef Instructor (Seasonal)** | Toscana Saporita, Massaciuccoli, Italy | Sep 2016 - Dec 2016 – Provided detailed instructional guidance and feedback to culinary students while monitoring safety standards.
