PROFESSIONAL SUMMARY

Business Analyst with dual degrees in Computer Science and Business Administration, combining technical depth with business acumen to deliver data-driven insights across complex environments. Proficient in SQL, Python, and Tableau to clean large datasets, identify performance trends, and communicate findings to stakeholders. Experienced in requirements gathering, dashboard development, and process optimization through hands-on analytical projects.

EDUCATION

SUNY Old Westbury
B.S., Computer Science.
Hofstra University
B.B.A., Management.

Old Westbury, NY

Hempstead, NY

EXPERIENCE

Referral Coordinator / Deposition Coordinator / Client Services Representative
Medsource National

Feb 2019 – Sep 2023
Garden City, NY

- Received, reviewed, and triaged several hundred inbound referrals per week from insurance adjusters and defense attorneys, verifying that all required information was complete before routing to data entry.
- Managed confidential client files, medical reports, and independent medical examination reports with attention to data governance and compliance.
- Coordinated depositions and resolved scheduling conflicts between physicians, patients, and legal counsel through clear stakeholder communication.
- Onboarded and trained incoming client services personnel on internal platform systems, communication workflows, and procedural protocols.

Data Entry Specialist
Lawyers Land Services

Oct 2018 – Feb 2019
West Hempstead, NY

- Digitized, validated, and organized legal documents into structured databases to ensure data integrity.
- Conducted quality control reviews by comparing digital database entries against physical source documents to reduce data errors.
- Managed secure storage, retrieval, and disposal of outdated confidential records in accordance with privacy standards.

Independent Rideshare Driver
Uber

Jun 2024 – Present
Queens, NY

- Managed daily route logistics while maintaining full compliance with local traffic laws, safety regulations, and platform guidelines.

PROJECTS

Superstore Sales Analysis <https://github.com/mcovelli/SuperStoreSalesAnalysis.git>

- Analyzed 10,000+ commercial sales transactions using SQL to evaluate regional business performance and compiled findings into a Tableau dashboard and PowerPoint presentation.
- Isolated a revenue issue where aggressive discounting in the Central region caused a negative 133% profit margin that dragged down overall profitability.
- Cleaned and verified transaction records by validating order dates and customer IDs while removing null, whitespace, and negative sales values.
- Built dashboards visualizing performance trends and sub-category profitability, enabling identification of underperforming regions and discount losses.

NYC Crime Complaint Analysis https://github.com/mcovelli/nyc_crime_complaints.git

- Processed 9.4 million NYC crime records from 2006 through 2024 using Python to examine trends across temporal and demographic segments.

- Executed data cleaning and validation routines in Python to standardize demographic fields and correct offense dates across millions of rows.
- Built and deployed a live Streamlit web application featuring twelve data visualizations and local Llama 3 model integrations via Ollama for automated summaries.

Database System with Web Interface <https://github.com/mcovelli/SystemsProject.git>

- Collaborated on a 58-table relational schema in MariaDB modeling student, faculty, and enrollment structures across hundreds of thousands of records.
- Implemented database-level stored procedures and triggers to enforce business logic and data integrity rules.
- Validated generated data across all 58 tables to resolve referential integrity issues and ensure consistency between related entities.
- Hosted database infrastructure and deployed a functioning role-based PHP web interface on AWS.

CERTIFICATIONS

- Google Data Analytics Professional Certificate | Google / Coursera

SKILLS

Data & Analytics: SQL, Data Visualization, Business Intelligence Analysis, KPI Tracking, Statistical Analysis, Data Cleaning, Data Validation, Data Organization

Analytical Tools & Platforms: Tableau, Microsoft Office Suite (Excel, Word, Outlook, PowerPoint), MariaDB, MySQL Workbench, Google Workspace, AWS, GitHub

Core Competencies: Requirements Gathering, Stakeholder Communication, Data-Driven Decision Making, Process Optimization, Trend Analysis, Reporting, Database Design, Data Integrity

Programming Languages: Python, SQL, PHP, HTML, CSS, Java, C++, Kotlin (Android Studio)
